SKILLS

Frontend Development	**Next.js, React.js, HTML5, CSS3, Tailwind, Bootstrap, MUI**
Backend Development	**Node.js, Express.js, Socket.io, FastAPI(Basic)**
Database & Storage	**MongoDB, Supabase, PostgreSQL(Basic)**
Programming Languages	**JavaScript, Python(Basic)**

EXPERIENCE

Front End Developer - Redcliffe Labs, Noida — December 2025 — Present

- Enhanced and scaled the consumer web application for booking diagnostic tests and packages using Next.js, MUI, and Styled Components.
- Implemented new features and enhanced existing flows across landing pages and booking journeys, improving overall user experience.
- Working on multiple internal CRM systems (support, sales, LIMS, HRMS) using React.js, MUI, and Tailwind CSS.

Front End Developer - Avaronn , Noida — May 2025 — December 2025

- Built a dashboard for real-time fleet tracking with driver scores, trip summaries, and downloadable reports (individual and fleet-wide).
- Created an **WarRoom panel** to live-track the fleet using SocketIO, **Google Maps API**, and real-time driver/vehicle data.
- Designed a **Schedule Creator app** for customers to book delivery slots with geolocation and route-based intelligence.

Front End Development Intern - EPVI , Gurugram — Sep 2024 — Nov 2024

- Collaborated with a team to develop and optimize user interfaces using **React.js** and **Next.js.**
- Implemented responsive design principles to enhance user experiences across devices.
- Integrated APIs to dynamically update frontend components and ensure smooth functionality.

PROJECTS

Routemate — Route Planning & Map-Based Simulation System

- Built a route creation flow where user can generate optimized routes using a Valhalla routing engine
- Designed request–response pipeline for constraint-based routing (toll/highway avoidance)
- Developed interactive map UI using MapLibre with route rendering and vehicle movement simulation
- Designed support for user-defined geospatial constraints (no-entry zones) using Supabase and Shapely

RealTimeRivals — WebRTC Multiplayer Game

- Built a real-time 1v1 browser game using WebRTC data channels for low-latency communication
- Implemented host-authoritative game state with WebSocket-based signaling
- Integrated real-time voice chat using WebRTC media streams
- Developed a canvas-based game engine with custom physics and combat logic
- Hosted Link: real-time-rivals.vercel.app

Ridemate — Real-Time Group Riding and Safety

- Built a mobile-first group riding application with real-time location sharing and interactive maps
- Implemented ride tracking, session duration, distance metrics, and ride history
- Developed emergency SOS alert, group chat, and WebRTC-based voice calling
- Built using React, Vite, Node.js, Express.js, WebSockets, and Supabase
- Hosted Link: ride-mate-frontend-r1lp.vercel.app

ACHIEVEMENTS

Web3 Hackathon : Built a Tuition Fees Payment App using Solidity and EAS at the EDU Chain Regional Hackathon at MSIT, Delhi.

EDUCATION

BCA in DataScience, *JC Bose University of Science and Technology, Faridabad* — CGPA: 8.15 — August 2024
